

A SAMPLE UNIVERSITY OF HOUSTON DISSERTATION TEMPLATE

by

First M. Last

A dissertation submitted to the Department of Electrical and Computer

Engineering,

Cullen College of Engineering

in partial fulfillment of the requirements for the degree of

DOCTOR OF PHILOSOPHY

in Electrical Engineering

Chair of Committee: Professor Jane Advisor

Co-Chair of Committee:

Committee Member: Professor John Member

Committee Member: Professor Alice Member

Committee Member: Professor Robert Member

University of Houston

May 2026

DEDICATION/EPIGRAPH

To everyone who made this work possible.

ACKNOWLEDGEMENTS

This page is optional. The guide recommends keeping acknowledgements brief and professional.

ABSTRACT

This template encodes the October 2022 Cullen College of Engineering thesis and dissertation guide into a reusable LaTeX workflow. It uses the required page geometry, double spacing for body text, single-spaced figure and table captions, bottom-centered page numbers, Roman numerals for front matter, and Arabic numerals beginning with Chapter 1. Replace this paragraph with an abstract of no more than 350 words that states the problem, methods, results, and conclusions.

TABLE OF CONTENTS

DEDICATION/EPIGRAPH	i
ACKNOWLEDGEMENTS	ii
ABSTRACT	iii
I Introduction	1

A Appendix Title	6

LIST OF TABLES

I.1 Example table caption.	2
------------------------------------	---

LIST OF FIGURES

I.1	Example figure caption. Captions are single-spaced by class default. .	1
-----	--	---

CHAPTER I

INTRODUCTION

This file is a starting point rather than a complete dissertation. The main body is double-spaced, with a 1.5 inch left margin and 1 inch margins on the other sides, matching the guide.

The front matter order implemented here is title page, optional copyright page, optional dedication, optional acknowledgements, abstract, table of contents, list of tables, and list of figures. References appear before appendices.

I.1 Example Figure and Table Placement

The guide requires figures and tables to appear near the point of mention instead of being grouped at the end of a chapter or appendix.

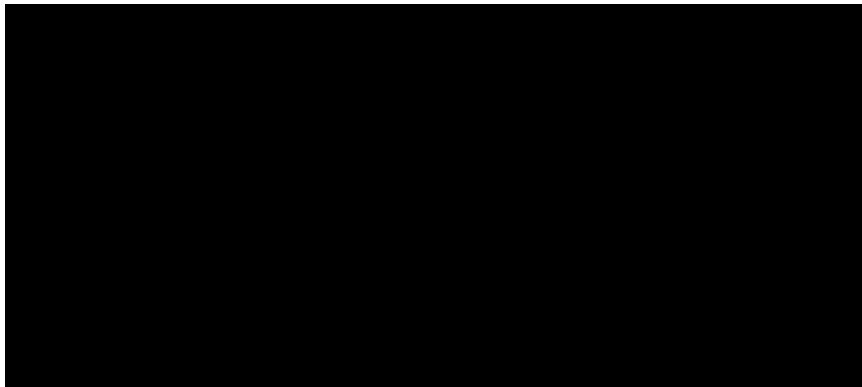

Figure I.1: Example figure caption. Captions are single-spaced by class default.

Table I.1: Example table caption.

Item	Value
Example	1
Sample	2

CHAPTER II

REVIEW OF PREVIOUS WORK

Use the normal chapter structure for your literature review, methodology, results, and conclusions. If your department requires a specific citation style, update the references accordingly.

II.1 Equation Numbering

Equations are numbered by chapter.

$$E = mc^2 \tag{II.1}$$

CHAPTER III

RESULTS AND DISCUSSION

Populate the remaining chapters with your actual content. Keep formatting consistent across headings, paragraph indentation, captions, and pagination.
